Lock type

RoHS Directive compatibility information http://www.nais-e.com/

## PUSH-BUTTON SWITCHES

## FEATURES

1. High performance and excellent characteristics.
An AH7 snap action switch is used in the switch body and since the installation frame is made of molded plastic, dimensional accuracy is now on a new level.
2. Two series: push type and lock type Lock type also available that locks when rotated.

## 3. Six push-button colors

You can use colors in accordance with sequence functions.
4. The switch body uses an AH7 snap action switch (O.F. 3.92 N max. type). Also, if dirt and water resistant properties are required of the internal switch, a V type turquoise switch (sealed type snap action switch) can be built in. Please inquire.

## PRECAUTIONS WHEN USING CADMIUM-FREE CONTACT TYPE

Models with cadmium-free contacts have been introduced in order to reduce environmentally harmful substances. (" F " is affixed to the end of the part number.) We ask customers who are currently using products with cadmium-containing contacts (no "F" at the end of the part number) to please make the switch to models with cadmium-free contacts. When switching, operating life may differ depending on the load. Please be sure to verify this by conducting an evaluation using actual equipment.

## PRODUCT TYPES

| Type | Part No. | Push-button color (Number replaces asterisk in part number.) |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Black | Red | Green | Yellow | White | Blue |
| Push type |  | 1 | 2 | 3 | 4 | 5 | 6 |
| Lock type |  | 1 | 2 | 3 | 4 | 5 | 6 |

## SPECIFICATIONS

## 1. Contact rating

| Kind of load | AC rating | DC rating |
| :---: | :---: | :---: |
| Resistive load (cos nearly equal 1.0) | $15 \mathrm{~A} \mathrm{125V} \mathrm{AC,15A} \mathrm{250V} \mathrm{AC}$ | $0.6 \mathrm{~A} \mathrm{125V} \mathrm{DC}$ |
| Inductive load(cos nearly equal 0.4) | $10 \mathrm{~A} \mathrm{125V} \mathrm{AC,10A} \mathrm{250V} \mathrm{AC}$ | $0.6 \mathrm{~A} \mathrm{125V} \mathrm{DC}$ |

2. Characteristics

| Expected life | Mechanical | Min. $10^{7}(60 \mathrm{cpm})$ |
| :--- | :--- | :--- |
|  | Electrical | Min. $10^{5}(20 \mathrm{cpm})$ at rated load |
| Insulation resistance | Min. $100 \mathrm{M} \Omega($ at 500 V DC measured by insulation resistive meter) |  |
| Breakdown <br> voltage | Between non-continuous terminals | 1000 Vrms for 1 min. (at detection current: 10 mA$)$ |
|  | Between each terminal and other exposed metal parts | 1500 Vrms for 1 min. (at detection current: 10 mA$)$ |
|  | Between each terminal and ground | 1500 Vrms for 1 min. (at detection current: 10 mA$)$ |
| Contact resistance | Max. $50 \mathrm{~m} \Omega$ (By voltage drop at $1 \mathrm{~A}, 6$ to $8 \mathrm{~V} \mathrm{DC)}$ |  |
| Allowable operation speed (No load) | 0.1 to $1,000 \mathrm{~mm} / \mathrm{s}$ |  |
| Max. switching frequency (No load) | 600 cpm |  |
| Ambient temperature | $-25^{\circ} \mathrm{C}$ to $+85^{\circ} \mathrm{C}\left(\right.$ Not freezing below $\left.0^{\circ} \mathrm{C}\right)$ |  |
| Contact material | Movable: $\mathrm{AgSnO} \mathrm{O}_{2}$ alloy; Fixed: AgZnO alloy |  |

DIMENSIONS (mm) (General tolerance: $\pm 0.4$ )

Mounting dimensions
(Panel thickness: Max. 3 mm)

## NOTES

1. For panel installation, please tighten with a torque of no more than 1.47 N.m.
2. For push-button installation, please tighten with a torque of no more than $0.49 \mathrm{~N} \cdot \mathrm{~m}$.
3. Notch is provided on the operation shaft and pushbutton to prevent the push-button from falling off. After using the notch, screw in a further 120 to $160^{\circ}$ (3 or 4 threads).
4. Please note that the number changes when the push-button is replaced.
